IS BARELY ENOUGH FOR FOOD SUPPLY

Proposed Extension of Workhouse Appropriation Insufficient. Whittaker Says.

IN NEED OF LARGER SUM FOR ORDINARY ACTIVITIES

Limited. Under the Resolution Adopted by Congress.

"One-twenty-fourth of the amount apattaches of the institution, if it will do that," declared W. H. Whittaker, superintendent of the big workhouse and farm at Occoquan, today. He was discussing the action of Congress in passing a resolution continuing last year's District appropriations, pro rata, for the first days of July, because of the delay in passing the new District of Colum-

Supt. Whittaker further declared that the operations of the workhouse would be seriously interfered with and many of its activities curtailed should the appropriation for its support be continued only as provided in the resolution adopted by

"At this time of the year," he stated.
"supplies of all kinds at the workhouse are permitted to run very low. In anticipation of the new appropriation, stocks of clothing, shoes, tools, supplies of all kinds, and the food supply are lower than at any other time during the fiscal year. Expenditures are not made in absolutely could monthly portions as it is necessity.

of July."
Similar conditions, it was learned today, exist at the numicipal bathing beach. The botts are kept open only about three months of the year, though the appropriation for its support is an annual one. The terms of the continuing resolution, limiting the funds that may be used to one-twenty-fourth of the amount of the annual appropriation for last year, will make it possible to keep the beach available only a few days, according to the declaration of Dr. W. B. Hudson, superintendent of the beach, today.

Limited Amount Available.

"I was under the impression, when I had been made for keeping the bathing beach open for the first half of July. The wording of the resolution shows. however, that only a very small amount would be available for the bathing beach --not more than enough to keep it going for a few days at the most. The annual appropriation for the beach is expended in about three months during the summer, though it is in fact an annual appropriation. Divided here the provinces the like the provinces the provinces the provinces that the provinces th though it is in fact an annual four station. Dr. Hudson stated that a number of members of Congress who are interested in the municipal bathing beach have promised to take the matter up at once with Representative Fitzgerald in the convention of the convention at once with Representative Fitzgerald in the effort to have the appropriation bodies on the District appropriation bill, and sent the uncompromised in a different manner. He said that these congressional friends of the beach would endeavor to have the resolution amendment, which the Senate refuses amended so as to provide the same amended so as to provide the same amount for the support of the beach during the first fifteen days of July, 1914, as was available for use during the first fifteen days of July, 1913. Unless this could be brought about, Dr. Hudson this could be brought about, Dr. Hudson the support of the beach support of the support of t stated, it may be necessary to close the

Auditor Tweedale stated today that under the terms of the continuing appropriation resolution it would be need essary to close at least one of the ty-fourth of the amount of the annua sufficient to keep all of the stations lieved it would not be necessary to close more than one of them. Which station would be closed because of lack of funds, he said, was a matter to be leterinized later.

determined later.

Mr. Tweedale stated that, as he understood the wording of the resolution, it will not be necessary to exercise more than the ordinary prudence in conducting the other adars of the District in order to remain within the limits of the funds that will be available if the Senate convers in the aclution. However, he stated, it probably will be found impossible to keep the municipal bathing beach and swimming pools open after tomorrow, as, according to his understanding of the resolution, the sum of last year's constitution. tion, the sum of last year's appropria-tion of the beach will be divided int twenty-four parts, and only one-fif-teenth part of one-twenty-fourth may be expended on any one day. Such a minute sum, he said, would hardly suffice to keep the beach in operation more than one day.
